

CRYPTOVARNA

A Blockchain Hub

Meetup @Innovator

WHAT IS CRYPTOVARNA?

[CryptoVarna](#) is an independent organization, based in Varna, Bulgaria, promoting and advocating the blockchain technologies and decentralized solutions. We organize events, perform workshops, participate in projects and present local companies to the world.

VARNA

500,000+ population
6 universities
Low cost of living

WHY BLOCKCHAIN TECHNOLOGIES?

Blockchain is one of the distributed ledger technologies that became popular after the rise of Bitcoin. We believe that in the near future they will occupy all aspects of our lives in a similar way internet and smartphones do now

Lecture @University of Management

Our Main Activities

Events

Organizing conferences, events and meetups, local and international

Projects

Project design and development - original products and services for 3rd parties

Consulting

Business and government consulting, workshops and think tank

ICO

Organizing Initial Coin Offerings, crowdsale development, marketing, airdrops and support

Tokenization

Tokenization and token design - implementation of distributed, crypto-token into existing conventional business

Courses

Express, general and long-term courses and lectures about blockchain development

- ❑ Aug, 2018 - [EOS Hackathon](#) - Sidney
- ❑ Oct, 2018 - [Innowave Summit 2018](#)

Projects

We work on several projects within the organization. While some of them are strictly commercial others aim for public good.

Our current projects fall into the following main categories:

SMART CITY

We combine IoT, radio transmission media such as LoRa WAN and BLE, Cloud and Blockchain technologies, AI/ML and more, to build systems for autonomous, better working, corruption free and optimized cities. We collaborate with municipalities, governments, universities and companies to achieve that.

SMART DATA

We have projects related to smart statistics and better data management with respect to privacy. We would like to give the power to own his data back to the user but without limiting the business and statistical usages over it.

What We Can Offer

AWARENESS

Your logo could be on all our media, websites, projects, events, t-shirts etc. We are very active in communities and events so this will bring attention to your company as well

PUBLICITY

We don't only organize and participate in commercial events but also work on public causes and institutional projects etc. We have visibility on national and international media

INCREASED REPUTATION

By supporting us you also support our causes and projects such as decentralization, smart city and smart statistics, transparent elections and safe and cheap public services. Our team consists of proven and experienced experts and leaders, people with respect in the community

SYNERGY

Access to experts pool and valuable knowledge and participation in our projects

GOLD Sponsorship

Includes:

- ✓ Big logo on the website
- ✓ Logo on our print materials
- ✓ Custom workshops - on a topic defined by the sponsor, performed in a location by his choice, 2 times per year, up to 4 hours each. (transport and accommodation expenses are not included)
- ✓ Access to internal newsletter and access to key persons
- ✓ Ability to participate into internal and public projects organized by CryptoVarna

Usage of Funds

Rent

Rent for venues where we perform meetups and conferences

Conferences

Participation in 3rd party conferences and events - we aim for the highest publicity

Media

Online media and advertisement - our websites, our social channels etc.

Print

Print materials - brochures, catalogs and billboards, which will be used on events

Projects

Project bootstrapping - to create an MVP or bootstrap promising projects

Administrative

Administrative - legal and other administrative expenses
